

October 24, 2007

Dear Choir,

Two things of note: We will be singing "Prayer For Wholeness" this coming Sunday morning, October 28. I finally have the information from Gary Schulte until this week as to the sermon topic, and it seemed appropriate to me to repeat this simple anthem since:

1. It matches the general theme of Gary's sermon, and
2. It will be easier to put together at this last minute since we have a number of bigger pieces to put together for November and December.

The children will be offering two pieces this Sunday – the Introit and the Anthem.

Here is an easy way to put a link to the choir website on your computer's desktop. (I have found that a direct link is SO much easier to get to a website than trying to remember how to type in a web address!)

1. Right click in a empty area of the desktop.
2. Scroll down the menu to "new".
3. Pick "new shortcut".
4. A window will appear asking you what you would like to create a shortcut for.
5. Type www.musicatsouthcongo.org in the window.
6. click "next"

Type in a name for the shortcut, like "church music website", or "Mark's harangues", or whatever will help you remember what it is!

7. Click "finish".

You now have an easy link to the church website without having to type the full address! Alas, this will not work for MAC users - David, perhaps you can let me know how to put a link on MAC desktops!

In Christ,

Mark
